### DETAILED ACTION

1. This action is in response to papers filed on January 18, 2005.
2. Claims 1-12 are pending.
3. Claims 1-12 are rejected.

### *Double Patenting*

4. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

5. Claims 1-12 are directed to the same invention as that of claims 1-17 of commonly assigned U.S. Patent No 6 658 401 B2. The issue of priority under 35 U.S.C. 102(g) and possibly 35 U.S.C. 102(f) of this single invention must be resolved.

6. Since the U.S. Patent and Trademark Office normally will not institute an interference between applications or a patent and an application of common ownership (see MPEP § 2302), **the assignee is required to state which entity is the prior inventor of the conflicting subject matter.** A terminal disclaimer has no effect in this situation since the basis for refusing more than one patent is priority of invention under 35 U.S.C. 102(f) or (g) and not an extension of monopoly.

7. Failure to comply with this requirement will result in a holding of abandonment of this application.

***Response to Arguments***

8. Applicant's arguments, see pg 1-2 of Declaration under 37 CFR 1.132, filed January 18, 2005, with respect to being the sole inventor of the subject matter that is disclosed but not claimed in said patent but that might be claimed in the above-identified application (the common subject matter) have been fully considered and are persuasive. The 35 USC 102(f) of claims 1-12 has been withdrawn.

9. Applicant's arguments that the instant applicant and the '402 patent are not directed to the same invention have been fully considered but they are not persuasive. Applicant argues that the instant application is "might be used to determine who is infringing upon his patent" and Patent '402 "might be used to invalidate a patent", the second receiving means is capable of receiving both, there for does not qualify as patentably distinct. A recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. In a claim drawn to a process of making, the intended use must result in a manipulative difference as compared to the prior art. See *In re Casey*, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 136 USPQ 458, 459 (CCPA 1963). Arguments made in papers filed were directed solely to the 35 USC 102(e) rejection and the applicant does not argue the 35 USC 101 rejection the rejection stands.

***Conclusion***

1. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
